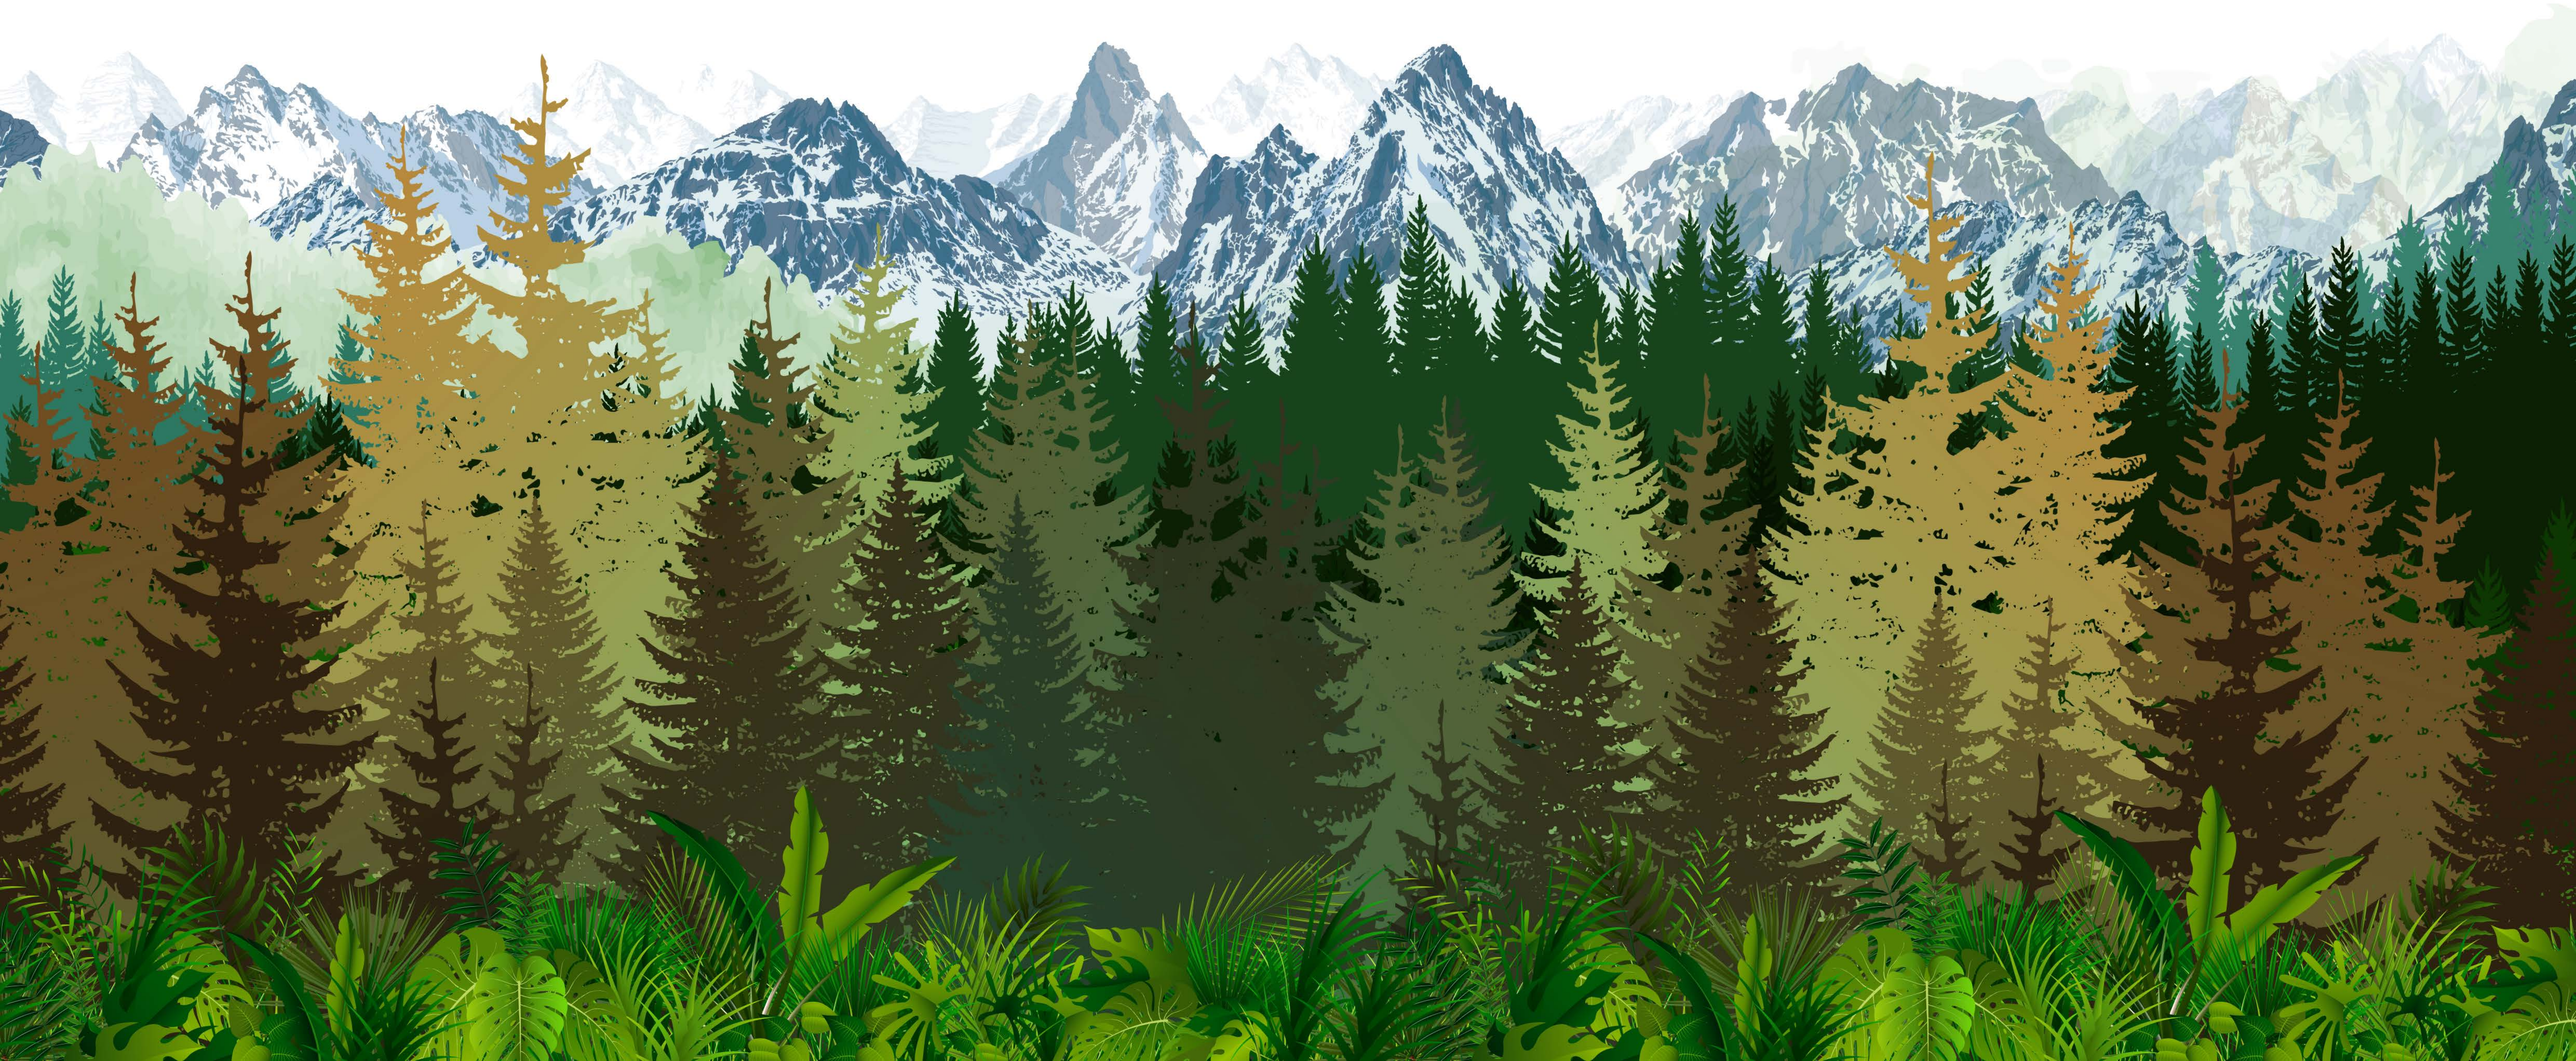
PARK RESIDENCES



OUR STORY

The love for mountains, long drives through the winding hills, views of the snowcapped Himalayan peaks and snowfall in the winters took us on many road trips to Uttarakhand, the land of divine and warm people. These trips into the Kumaon region of Uttarakhand led us to discover many beautiful places but the one that completely stole our hearts was Natadol which inspired us to build our hill home.

This journey that began for building our holiday home soon turned into a passionate dream of sharing with some of you, our love for the hills, green forests, showers of snow and a beautiful deck to sit out and enjoy the mesmerizing Himalayas.

That's when we, **P**raveena , **A**mrit, **R**avi & **K**unal, chose to create a community of 10 hill homes to be called **Park Residences** at Natadol.

Natadol, reaching to an altitude of 6800 ft, still preserves the virgin forests dotted with many fruit orchards and perennial streams and remains untouched by mass tourism. Herein, beneath the eyes of Saim Dev, we found the perfect hill slope nestled in the oak forest, gazing at the Himalayas to be the ideal place for building PARK residences as our Hill Homes.

We truly hope you enjoy this 'beautiful living' in the PARK alongside us!

CONCEPT

PARK Residences embodies an **‘Open yet Closed’** concept that offers openness for nature to enter your homes through its views, while providing safety, warmth and secure spaces within the homes.

ENVIRONMENT

Conserving the natural topography is key to any Hill Home.

Adhering to this age old tradition, the natural flora and the waterflow in the region have been preserved. Further, inclusion of rainwater harvesting, sewage treatment plants, solar lighting etc., promises to keep the place eco friendly.

All homes are in two levels with large open decks utilizing the natural contours of the Khets on the Hill face to achieve strength and architectural uniqueness.

PARK Residences, transfigured through contemporary approach while conserving the nature, is decidedly unique.
